The new Ariston Dishwasher Range

Style for living

Distinguishing features.
A unique design makes
your house unique too.

DESIGN: **MAKIO HASUIKE & CO**

The central philosophy of M. Hasuike's design is essentiality and harmony combined in a totally distinctive style. This is clearly evident in the new range of Ariston dishwashers - absolutely simple, rounded shapes with distinctive features such as the handle, the control panel and the new basket design. Particular attention to product design aimed at obtaining solid, innovative, functional appliances is an Ariston tradition. The new 2009 collection is aimed at those who wish to be surrounded by distinctive, beautiful objects which add warmth and beauty to the home.

Ariston Experience Steel.

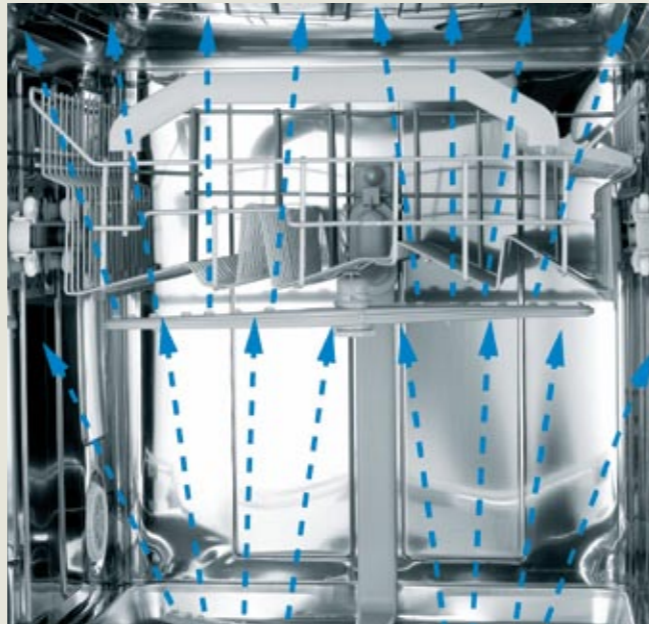

Ariston Experience Steel, the new stylish co-ordinated range of appliances in stainless steel, will win over the most refined taste. Minimalist flavour and sleek, hi-tech lines, combined with the cleanest of forms, make it an advanced, unique and sophisticated design that will suit perfectly the most modern kitchen settings, enhancing their personality and refinement.

Giving you the greatest aesthetic pleasure and performance meeting your highest expectations in the most modern and exclusive of surroundings.

Filter 3

A brand-new filter with 3 filtering levels was designed to correctly disperse the water and let the dishwasher operate optimally at all times.

To reach the dishes that are most difficult to wash, Ariston has redesigned the sprayers. This will ensure excellent wash performances and the AAA Class on the range's new models.

Lower rack with raised plate-separating grates.

Lower rack with lowered plate-separating grates.

The upper rack has four rows of adjustable inserts for optimal loading flexibility. The new dish-separating grate can be dropped quickly, making the bottom rack totally flat to accommodate bulky dishes. Taking away the silverware basket can make room for an additional 8 plates.

Extracting and loading the racks has never been so easy. The new telescopic guide system and ball bearings make the sliding upper-basket light and smooth, even when fully loaded.

The new Dual-Space* system lets all the space in the height of the lower rack to be used for plates and particularly bulky dishes. The height of the upper rack can be raised with a quick, simple and ergonomic action.

* Only available in LBF51 & LKF720.

Super Wash

A particularly energetic washing cycle for the dirtiest dishes and pots. Ariston's new dishwashers ensures brilliant results - goodbye to traces of encrusted dirt.

Class AAA

This is the highest European recognition in terms of performance and energy savings. In order to optimise washing efficiency throughout the cycle, Ariston has designed a new generation of high-yield motors. Conservative yet powerful when needed, it alternates between various operational speeds and water pressure according to the type of dirt on the dishes.

Quick, fast, immediate

The **Rapid 35'** cycle speaks for itself. Your lightly soiled dishes will be clean and ready for use in no time at all.

Crystal Care

Special cycle to be used for more delicate items that are sensitive to high temperatures. Rest assured that your most precious crockery and cutlery is being looked after.

Ready for Tabs

Ariston's new dishwashers have been developed to take full advantage of multi-use soap tabs. Thanks to an intelligent and new setting of the wash cycle parameters, the dishwasher can calculate the exact moment during the wash cycle to allow the different elements of the soap tab to dissolve and therefore guarantee the best wash results.

LI 645 A

60cm Fully Integrated Dishwasher

- 12 place settings
- Push button electronic program control
- 4 wash programs:

1) Super Wash	3) Daily Wash
2) Soak	4) Eco Wash
- 3 wash temperatures
- Height adjustable upper basket
- Extra Dry option
- Dynamic drying system
- Concealed heating element
- Rotating micromesh filter
- Overflow safety device
- Stainless steel door panel available as an option (XD2)
